NASDAQGS:AAPL (MI KEY: 4004205; SPCIQ KEY: 24937; TCUID: 43731)

As of: 22/06/2023

Company Description

Apple Inc. designs, manufactures, and markets smartphones, personal computers, tablets, wearables, and accessories worldwide. The company offers iPhone, a line of smartphones; Mac, a line of personal computers; iPad, a line of multi-purpose tablets; and wearables, home, and accessories comprising AirPods, Apple TV, Apple Watch, Beats products, and HomePod. It also provides AppleCare support and cloud services; and operates various platforms, including the App Store that allow customers to discover and download applications and digital content, such as books, music, video, games, and podcasts. In addition, the company offers various services, such as Apple Arcade, a game subscription service; Apple Fitness+, a personalized fitness service; Apple Music, which offers users a curated listening experience with on-demand radio stations; Apple News+, a subscription news and magazine service; Apple TV+, which offers exclusive original content; Apple Card, a co-branded credit card; and Apple Pay, a cashless payment service, as well as licenses its intellectual property. The company serves consumers, and small and mid-sized businesses; and the education, enterprise, and government markets. It distributes third-party applications for its products through the App Store. The company also sells its products through its retail and online stores, and direct sales force; and third-party cellular network carriers, wholesalers, retailers, and resellers. Apple Inc. was founded in 1976 and is headquartered in Cupertino, California.

Scope 3 downstream emissions are updated on a quarterly basis following the publication of a full set of financial year data for the Trucost universe. This is due to modelling requirements. As such, Scope 3 downstream data may not be immediately available for a given company, following the publication of its latest environmental profile. Historical Scope 3 Downstream data for prior years can be found in the Environmental History page.

Historical ESG Performance

For the purposes of providing a comparative assessment, the history chart shows what the S&P Global ESG Scores would have been including modeled scores in the years prior to 2023. These are not restatements of the historical S&P Global ESG Scores.

ESG Score Contribution

Apple Inc. | ESG Scores

Apple Inc.'s ESG Score including modeled is **50**, accounting for Media & Stakeholder Analysis adjustments.

The company scored well-above the **THQ Computers & Peripherals and Office Electronics** industry peer group average of **39**.

Apple Inc.'s data availability is **HIGH** within the industry, as it made available **82%** and **52%** of the required and additional disclosures, respectively.

Media & Stakeholder Analysis						
MSA TITLE	MSA DESCRIPTION	DATE	COMPANY RESPONSE RATING	IMPACT RATING	CRITERIA AFFECTED	
Preventing music streaming developers from informing users of subscription options outside the Apple App Store	In March 2024, the European Commission imposed a EUR 1.84 billion (USD 2 billion) fine on Apple Inc. for antitrust violations related to its App Store restrictions, which stifled competition from music streaming rivals of Apple Music. The fine originates from a 2019 complaint filed by Spotify against Apple. Spotify raised issues over rules introduced in the App Store that allegedly hindered competition between music applications and limited choices for app users. Apple establishes the terms and conditions developers must follow to be present in the App Store and reach iOS users. The tech giant also controls every aspect of the iOS user experience. The Commission found that Apple abused its dominant position by enacting anti-steering provisions, which restricted app developers from fully informing iOS users about alternative music subscription services outside the Apple ecosystem. Music streaming providers and other applications are also prohibited by Apple App Store policies from telling their customers on Apple devices how to update or sign up for subscription services outside of the App Store. Instead, iOS users are restricted to using Apple's payment mechanism for signing up for in-app subscriptions. Additionally, it was	19/04/2024	Some communication, no or partial measures	Medium	Business Ethics, Risk & Crisis Management, Customer Relationship Management	

Apple Inc. | ESG Scores

	forbidden for app developers to email recently acquired users to notify them of other pricing alternatives. The behavior reportedly lasted for about ten years, which, according to the Commission, may have led iOS users to pay "significantly higher prices" for music streaming subscriptions. The regulator also said Apple's anti-steering provisions led to a "degraded user experience."				
Alleged links to forced labor and human rights abuses of Uyghur minorities in the supply chain	Xinjiang is a region in northwest China where around 45% of the population belongs to the Uyghur ethnic minority. In recent years, the Chinese government has been reported to prosecute Uyghur and other minorities by, among other forms, placing them in internment camps, where some companies are accused of having built factories that allegedly use forced labor. Apple Inc. has been accused of being complicit in human rights abuses in the region through its supply chain. These allegations are linked to China's forced labor project, according to reports released by Tech Transparency Project and the Australian Strategy Policy Institute. UPDATES: In October 2022, US Senate Intelligence Committee Chairman Mark Warner criticized major corporations, including Apple, for "turning a blind eye" to China's human rights abuses despite their commitment to their ESG goals. Apple's FY2021 supplier list still includes companies that continue to receive accusations of direct or indirect complicity with forced labor operations in Xinjiang. These companies include Lens Technology and Foxconn among others. In May 2021 and June 2021, a new controversy arose against the company in regard to human rights and the repression of minority Uyghurs in Xinjiang. Following allegations related to manufacturing suppliers in 2020, the company is being held accountable for its relationship with wind turbine maker Xinjiang Goldwind Science & Technology Co., Ltd. The former reportedly participates in the same transfer program of Uyghurs as O-Film, which Apple Inc. ceased business with after the first allegations. In December 2020, documents released by the Tech Transparency Project alleged that thousands of Uighur workers from the Xinjiang region of China were forced to work at Lens Technology. Lens Technology is described in the reports as the company responsible for manufacturing iPhone glass, and appears under Apple's suppliers list that features the top 200 suppliers based on spend. In March 2020, the Australian Strategic Policy Institute also signaled Foxconn, Hubei Yihong Precision Manufacturing, Highbroad Advanced Material, and O-Film, -companies tied to Apple's supply chain-, as companies where labor transfers of Uighur Muslims workers were recorded. Uighur workers were allegedly transferred to Foxconn's "iPhone City," Apple's iPhone assembly plant according to the Australian organization report. O-Film also appears under Apple's suppliers list.	27/10/2023	Some communication, no or partial measures	Medium	Business Ethics, Human Rights, Supply Chain Management
Protests against harsh COVID-19 restrictions and overdue pay at supplier's assembly plant	In November 2022, a violent protest erupted in an iPhone manufacturing facility in Zhengzhou, China, over alleged employee pay issues and COVID-19-related concerns. The facility is considered the largest iPhone factory in China, and is owned by Foxconn, regarded as one of Apple's oldest and	27/10/2023	Some communication, no or partial measures	Medium	Risk & Crisis Management, Supply Chain Management

	largest suppliers. Tensions and unrest began in October 2022, when a COVID-19 outbreak hit the facility, forcing it into a lockdown. According to several employees, rumor mills, poor living and working conditions and the lack of transparency from Foxconn on the exact situation of the outbreak caused panic and pushed employees, most of whom were living in on-site dormitories, to leave and return to their hometowns. The significant reduction of the facility's workforce resulted in operational disruptions and delays in output. Following the incident, the Apple supplier reportedly advertised that it would offer CNY 25,000 (USD 3,592) to new employees and quadruple its daily bonus to retain existing employees, and in order to regain the thousands of employees it lost. On Nov. 23, 2022, employees gathered on the facility grounds to protest against the company's plan to delay the bonus payments it promised employees. Others also protested against the company's poor working conditions, claiming that some of them were forced to share dormitories with people who tested positive for COVID-19. The protest turned violent, with several employees smashing surveillance cameras and windows, throwing barricades and eventually clashing with security forces. Livestream footage of the protest quickly turned viral in Chinese media. As a result of the monthslong unrest, Foxconn reportedly struggled to fulfill orders for iPhone models, prompting Apple to announce that shipments of the iPhone 14 Pro and iPhone 14 Pro Max would be temporarily impacted.

The CSA methodology is updated each year to reflect shifting and emerging ESG risks and opportunities in each industry. Throughout a methodology year the number of overall assessed companies increases and the scores of already assessed companies can be adjusted following a Media and Stakeholder Analysis case (corporate controversy) or reassessments of underlying data. This can result in changes to industry averages, even if the company's own scores did not change. As part of the Media and Stakeholder Analysis, S&P Global analysts rely on a wide range of news sources, interactions with companies and information provided by RepRisk, a leading provider of ESG risk intelligence.

Public	
Year	Midholding Year 2023
Question	Biodiversity Commitment
Include Related Scores	Yes
Biodiversity Commitment	
Question	
Does your company have a publicly available commitment to maintain, enhance, or conserve biodiversity/ecosystems for your company's non-operational activities (e.g., production, extraction, plantation, or development activities), and is this commitment applicable to your company's supply chain?	
Rationale	
The purpose of this question is to evaluate the disclosure of a company's public policy or commitment to biodiversity, covering aspects to systematically address its dependency and impact-related biodiversity risks. This includes commitments to engage with its stakeholders, conduct risk assessments, and disclose its priority areas identified, as well as a commitment to setting targets to work towards no net loss. Furthermore, companies are expected to commit to disclosing mitigating actions they take as well as setting a long-term net positive impact commitment. All aspects covered are expected to be applied to its entire value chain and be endorsed by either a member of the board of directors or executive management.	
Performance Summary

Additional Question Guidance & Information Display	
Key Definitions	
Net Positive Impact (NPI): is a commitment, aligned with the "Post-2020 Global Biodiversity Framework", for outcomes to which the impacts on biodiversity across a company's value chain are stabilised in the next 10 years (by 2030) and allow for the recovery of natural ecosystems in the following 20 years with net improvements by 2050 to achieve the Convention's vision of "living in harmony with nature by 2050".	
Mitigation Hierarchy: A framework to help companies minimise negative impacts on nature with a long-term outlook. This prioritised approach guides companies to first, avoid the impacts, and if not possible, to limit or reduce impacts on nature, and next, to hold themselves accountable for restoring areas and ecosystems adversely impacted by business operations. Additionally, the option to offset or compensate aims to compensate for any residual, adverse impacts after full implementation of the previous three steps of the mitigation hierarchy. Building on this, companies might take transformative actions that address the socio-economic systems in which organisations are embedded and currently accelerate biodiversity loss.	
Targets to work towards no net loss: Must be linked to a company's biodiversity commitment/strategy and reduce dependency- and impact-related biodiversity risks for priority areas identified through the biodiversity risk assessments.	
Targets may be related to:	
- Avoidance or reduction of sourcing from areas of critical biodiversity - Reduction of land use change (e.g., deforestation) - Reduction of resource exploitation (e.g., water use in water-stressed areas, fisheries with stocks outside biologically sustainable levels) - Restoration or regeneration in critical value chain locations related to ecological integrity, connectivity, soil quality, etc. - Compensation through reforestation programs / creation of protected areas or reserves	
No Net Loss (NNL): is defined as the part of which project-related impacts on biodiversity are balanced by measures taken to avoid and minimise the project's impacts, to undertake on-site restoration, and finally to offset significant residual impacts, if any, on an appropriate geographic scale (e.g., local, landscape-level, national, regional).	
Priority Areas: are identified based on the assessment data on dependencies and impacts across a company's value chain to determine the relative contribution of different locations to a company's overall biodiversity-related risk exposure. Criteria for identifying priority areas may include:	
- High-priority sites, inputs, or product lines based on environmental and financial materiality - Contribution of different locations, commodities, suppliers to total impact of the company - Scale of nature to value chain locations - Needs of value chain stakeholders, such as dependency on ecosystem services	
Risk Assessment: Businesses should carry out risk assessments of their dependencies and impacts on biodiversity and ecosystem services. From global risk mapping that allows companies to identify operations with a high degree of exposure to potential biodiversity and ecosystem service risks, to further site-level risk assessments, aimed at mitigating potential environmental and social risks.	
Stakeholder: Persons or groups who are directly or indirectly affected by a project, as well as those who may have interests in a project and/or the ability to influence its outcome, either positively or negatively. Examples of stakeholder engagement may include any of the following:	
- If the company collaborates with experts (consultants and NGOs) to realise their own biodiversity strategy - Suppliers - Local community engagement - NGOs on specific conservation or restoration projects - Investor companies	
Natural Capital: is another term for the stock of renewable and non-renewable natural resources on earth (e.g., plants, animals, air, water, soils, minerals) that combine to yield a flow of benefits or "services" to people. These flows can be ecosystem services or abiotic services, which provide value to businesses and to society.	
Ecosystem services: Are defined as the direct and indirect contributions of ecosystems to human wellbeing and have an impact on survival and quality of life. There are four types of ecosystem services: provisioning (oil, timber, fibre, etc.), regulating (pollination, flood control, climate regulation, etc.), cultural (recreation, aesthetic values) and supporting services (photosynthesis, water/nutrient cycles, etc.).	
Abiotic services: Are benefits to people that do not depend on ecological processes but arise from fundamental geological processes and include the supply of minerals, metals, and oil and gas, as well as geothermal heat, wind, tides, and the annual seasons.	
Biodiversity: is the total variety of all Earth's species, their genetic information, and the ecosystems they form. It is critical to the health and stability of natural capital as it provides resilience to shocks like floods and droughts, and it supports fundamental processes such as the carbon and water cycles as well as soil formation. Therefore, biodiversity is both a part of natural capital and also underpins ecosystem services.	
Critical Commodities: Raw materials which have either been extracted (i.e., hard commodity) or grown (i.e., soft commodity). These critical commodities either have a significant impact on biodiversity in their production process or depend on functioning biodiversity to achieve an optimal output. Examples of such critical commodities (such as defined by the ICJ rules for deforestation-free products) may include:	
- Beech - Wood - Palm oil - Cocoa - Coffee	
Additionally, considering their high potential impact on biodiversity, we consider rubber and cotton as potential supply chain risks.	
Areas: refers to land, sea, or any other natural environment which is owned, leased, operated, or permitted by the company.	
Site Proximity: Value chain sites which either contain (i.e., overlapping) or are adjacent (between 0 and 2km from nearest site) to landscapes, seascapes, and watersheds critical to biodiversity.	
Sites containing globally or nationally important biodiversity: Also referred to in the criteria as "Critical Biodiversity" and can include:	
- Species classified as Critically Endangered, Endangered, or Vulnerable on the IUCN Red List, endemic species - Internationally recognised areas: World Heritage sites, Ramsar Wetlands, UNESCO MAB, Biodiversity Hotspots - Nationally important biodiversity can include legally protected areas, habitats, and species	
Companies are expected to have a position or commitment on biodiversity and the impact of their operations, even if they do not currently operate in sites containing globally or nationally important biodiversity.	
Own Operations: Own employees, own business, subsidiaries, own products and services, business units, regions, sites, plants, facilities	
Suppliers: include brokers, consultants, contractors, distributors, franchisees or licensees, home workers, independent contractors, manufacturers, primary producers, sub-contractors, tier-1 and tier-2 and other related	
Partners: include agents, lobbyists and other intermediaries, joint ventures and consortia partners, customers, clients	
Data Requirements	
This question requires supporting evidence from the public domain. The information provided has to be included in your public reporting (e.g., annual report, sustainability report, integrated report, company publication) or corporate website.	
This question may be marked "Not Applicable" for companies that can credibly demonstrate in a comprehensive comment that their company has:	
- No impact on biodiversity in its own operations - No impact on biodiversity in the company's key raw material supply chains - No impact at the use phase or end-of-life of production/service use - No financing activities which impact or depend on biodiversity	
Industry-Specific Guidance	
Utilities (BLC, GAS, NUW)	
- BLC & GAS: Utilities that have no power generation or transmission business or are only in electricity/gas distribution should mark "Not Applicable" and provide an explanation in the comment box. - NUW industry: Pure water utilities should mark "Not Applicable" and provide an explanation in the comment box.	
Real Estate (REI and REM)	
Companies that have not marked 'Development of major renovation and new construction' as one of the main activities of the business in question '1.1 Denominator Area' should mark "Not Applicable".	
Companies that have marked 'Development of major renovation and new construction' as one of the main activities of the business in question '1.1 Denominator Area' but are only operating in urban environments should mark "Not Applicable" and provide an explanation in the comment box.	
Consumer Discretionary (CNO, REX, TRT)	
Companies in the following industries that are only providing online services should mark "Not Applicable" and provide an explanation in the comment box.	
- CNO: Casinos & Gaming Industry - REX: Restaurants & Lodging Facilities - TRT: Hotels, Resorts & Cruise Lines	
Industrials (ICS)	
Companies in the Commercial Services and Supplies (CSC) industry that are not involved in waste management activities should mark "Not Applicable" and provide an explanation in the comment box.

QUESTION LEVEL, REPORT	COMPANY ANSWER
Company has a public policy or commitment on biodiversity	Applicable
Commitment not to operate in/operate/extract in World Heritage areas and IUCN category I-IV protected areas	-
Biodiversity commitment includes the application of mitigation hierarchy when operating in areas with globally or nationally important biodiversity	-
Biodiversity commitment includes working with external partners to help the company fulfil such commitment	-
Biodiversity commitment includes a target for net positive impact	-
Biodiversity commitment includes a target for no net loss or net improvement	-
Scope of the biodiversity commitment includes own operations	-
Biodiversity policy or commitment is endorsed by a member of either the Board of Directors or Executive Management	Executive
This document refers to the company's target year for its net positive impact commitment. (Calendar Year)	Not answered
Biodiversity policy/commitment defines conducting a risk assessment	-
Scope of the biodiversity commitment includes suppliers	-
Scope of the biodiversity commitment includes partners	-
Company has a policy endorsed by a member of either the Board of Directors, or Executive Management	YES

Does your company have a public policy or commitment on biodiversity? Please indicate where this information is available in your public reporting or corporate website.

1. ☒

Yes, we have a public policy or commitment in place on biodiversity

Policy or Commitment aspects

Our policy or commitment defines the following aspects:

1. ☐

Achievement of a net positive impact (NPI) on biodiversity

Please indicate the target year:

Not answered

2. ☐

Definition of biodiversity-related targets for priority areas to work towards no net loss

3. ☐

Commitment required of value chain to avoid operational activities near sites containing globally or nationally important biodiversity

4. ☐

Application of a mitigation hierarchy

5. ☐

Conducting a biodiversity risk assessment

6. ☐

Engagement with stakeholders on biodiversity

Scope of Commitment

Which parts of your value chain are covered by your biodiversity policy or commitment?

1. ☐

Own Operations

2. ☐

Suppliers

3. ☐

Partners

Policy Endorsement

1. ☒

Is your policy endorsed by a member of either the Board of Directors, or Executive Management?

1. ☐

Board of Directors

2. ☒

Executive Management

2. ☐

No, we don't have a public group-wide policy, commitment, or pledge on Biodiversity

3. ☐

Not applicable. Please provide explanations in the comment box below

Confidential additional comments

Use the text field below only in the following cases: (i) to describe significant changes in data or calculation methodology compared to last year's submission, (ii) to explain why a question is not applicable to your company's business model, (iii) to explain if your data deviates from the unit or format requested, or (iv) to provide supporting notes on translations of non-English references.

¹All results are taken from the most recently filed statement for each period. When there has been more than one, earlier filings can be viewed on the individual statement pages.

²Growth rates for the LTM period are calculated against the LTM period ending 12 months before.

³All forward period figures are consensus mean estimates provided by the brokers and may not be on a comparable basis as financials.

†Growth rates for forward periods are calculated against prior period estimates or actual pro forma results as disclosed on the Estimates Consensus page.

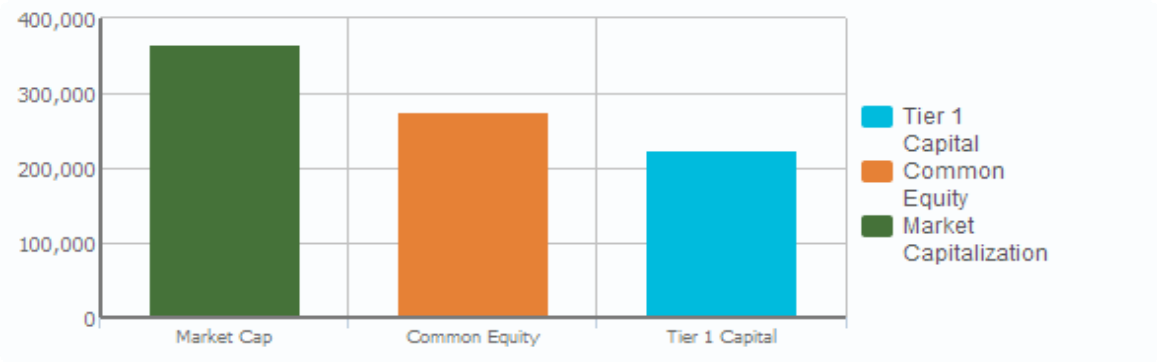

Growth Rates are calculated in originally reported currency only and will not reflect any currency conversion selected above.

¹All results are taken from the most recently filed statement for each period. When there has been more than one, earlier filings can be viewed on the individual statement pages.

²Growth rates for the LTM period are calculated against the LTM period ending 12 months before.

³All forward period figures are consensus mean estimates provided by the brokers and may not be on a comparable basis as financials.

†Growth rates for forward periods are calculated against prior period estimates or actual pro forma results as disclosed on the Estimates Consensus page.

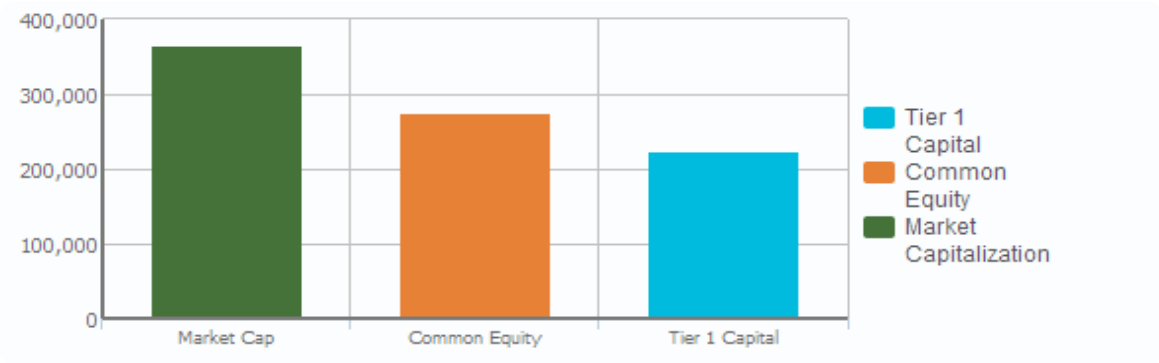

Growth Rates are calculated in originally reported currency only and will not reflect any currency conversion selected above.
